📁 Experience

Johnson Law Group, Software Engineer 2025-26

- Contributed to a production Rails + Svelte Salesforce-synced portal for UK group action claims, serving a six-figure client base with case tracking and multi-step task flows.
- Built large email and SMS campaigns driven by client data and case facts.
- Implemented a new design system and staff tooling.

Freelance, Web Developer since 2023

- Rebuilt a global marketing agency's Next.js/React website, implementing a new design with SVG and scroll animations.
- Designed wireframes and built a Rails prototype for a United Nations IOM project research portal (commissioned by a UK-based research & advisory firm).
- Built and deployed landing pages for artists and art projects using Rails and static site generators.

Le Wagon, Web Dev Teacher 2023-25

- Delivered live full-stack programming training to 230+ students through lectures, coding sessions and 1:1 tickets.
- Led students in developing 60+ Rails CRUD MVPs, covering schema design, routing, back-end and front-end.

Maison Ferber, Project Lead 2018-22

Lazard, M&A Analyst 2015-17

Internships 2011-14

Embassy of France in Bangkok/French Treasury, Lazard, PwC, Deloitte, Pierre Hermé Paris
